HAN and Discovery Services

# Web API — Meta search engines interlinking with HAN

Every user is allowed to search within all e-resources available at the library. The List of results and where they are provided is given to every user. By choosing one source from a specific provider HAN takes over all necessary processes.

## Search over...

- Primo (including Single Sign On with HAN)
- EDS
- Summon
- VuFind
- Lukida

## List of Results

## Available over...

- SFX
- Ovid
- Linksolver of EDS

Authentication via...  
Aleph/ALMA, PICA, SISIS,  
VTLS/Chamo, Horizon,  
KOHA, ADIS, LDAP,  
ODBC-interfaces, Shibboleth)

## HAN

- Authorization
- Recordings for statistical matters
- Hidden Login
- License Control
